Brief Description of Project Relevance to this Contract

Bay Area Rapid Transit (BART) is currently replacing critical Traction Power infrastructure throughout the system. This new infrastructure is vital to improving the customer experience by increasing service reliability.

Summary Statement for Project

VST Engineering serves as Project Manager for seven projects totaling \$487.5M ranging from project planning to construction. VST is responsible for managing project schedules and budgets. VST Engineering is also responsible for coordinating among affected BART stakeholders for both contracted projects and projects being performed by in-house forces.
